

Formatting in ms word (part I)

1. What are bullets? Write the steps to add bullet in a document.

Bullets are small symbols or marks used to create a list in a document. They help to organize information clearly and neatly.

Steps to add bullets in a document:

- ★ Place the cursor where you want the bullet to appear
- ★ Click the drop-down arrow next to Bullet
- ★ Select the desired bullet from Bullet Library.

2. When will you use multilevel lists?

Multilevel lists are used when information has main points and subpoints. They help to arrange content in different levels for better understanding. For example, they are useful while preparing chapter headings with subheadings.

3. Write the steps to change the line spacing.

Step to change the line spacing :

1. Step 1: select the paragraph for which you want to define the spacing.
2. Step 2: click on the Line Spacing Button arrow. A list of options to adjust the space between the lines will appear.
3. Step 3: select any of the options available by clicking over it.

4. Write the steps to change page orientation.

Page orientation means position of a paper, i.e., horizontal or vertical in a document.

The steps to change the page orientation:

1. Open a word document for which the page orientation has to be changed.
2. Click on the page layout tab and click orientation button available in the page setup group.
3. Select the desired orientation (portrait & landscape) to be applied to the document.

5. Write the steps to change the page margin.

Step to change the page margin:

Step 1: Open the document whose margin are to be set.

Step 2: Go to page layout tab, and click margin button in the page setup group

Step 3: A page setup dialog box will be displayed, where you can set top, left, right and bottom margin under the margins tab.

Step 4: Select apply to option to apply the margin to the selected text or documents

Step 5: Click OK button.

6. How to align text in a document?

Step to align text in a document:

Step 1: select the text to be aligned

Step 2: Click on any of the alignment buttons available on the Home Tab to align the text to Center or Justify or Left or Right.
